

The advertisement features a vibrant orange background with several Philips EasyKey 6100 series smart door locks. One lock is shown in a close-up, highlighting its sleek, black, push-pull design. Another lock is shown from a different angle, displaying its numeric keypad and various function buttons. A third lock is partially visible in the top right corner. A white and orange graphic overlay on the left side contains the Philips logo and product information.

6100 series

Push-pull
Smart Door Lock

Trend leading one-step door opening

A new lock that your new home deserves

Philips 6100 series push-pull door lock is designed compact and stylish, perfect for young people. With any of the 6 unlocking solutions, you can open the door in one step. Now, forget the keys and embrace an affordable smart new life.

Extraordinary design brings outstanding experience

- Simple and compact design tailored for a modern new home
- Smooth and durable surface with IML finishing
- Pleasing to the eye, handy in use

Multiple protection in one for overall home safety

- Dual verification boosts home entry security
- One-key anti-theft mode for instant inside unlock alarm
- Fake PIN code function prevents password disclosure
- Hidden C-grade lock cylinder for doubled security
- Inner rotary knob for easy door opening by one twist

More convenience in your life

- Patented full auto mortise: unlock and open at one go
- Automatic locking lets you leave home without double check
- One-time password, convenient for friends and cleaners
- Voice guide makes operation and settings much easier

Smart life "locked" with excellence

- Multiple unlock solutions: Say goodbye to the key-only era
- Wireless network extension prepared for future smart life
- Switch between automatic and manual modes as needed
- Supports emergency power supply and low battery alarm
