Smart Video Door
Lock

Alpha-VP-5HWS

Wonderful life starts from a

Remote video intercom

Philips smart door lock Alpha-VP-5HWS integrates the door viewer, doorbell, and door lock. It adopts a 2MP wide-angle camera and supports Wi-Fi networking, allowing you to view the doorway via the App and bringing a visible security guard.

Realtime Wi-Fi connection

The Philips Alpha-VP-5HWS makes real-time online via the Wi-Fi connection. After binding the Philips EasyKey App, you can view the lock access history, remotely send temporary PIN codes, and view the real-time situation at the door by clicking the video button.

Remote video intercom

When the visitor presses the doorbell, a message will push to the mobile App instantly. You could start the two-way audio by tapping the message box to connect to the App. When the doorbell rings, the video lock will automatically record the video, so you won't miss any visitor information even when you are not at home.

4-inch IPS screen

There is a 4-inch IPS display on the indoor escutcheon. You can click the button of the display to view the visitors and the situation at the doorway. Re-clicking the button allows you to turn off the screen, which is convenient for the elderly and children. Additionally, you can adjust the brightness and sleep mode timeouts of the screen via the mobile App.

Wide-angle night vision camera

Philips Alpha-VP-5HWS equips with a 144° wide-angle camera and two low-power infrared fill lights. It has daytime mode and night vision mode. When the light is dim, the infrared fill light will automatically turn on, switch to night vision mode, and recognize the facial features within 1 meter from the lock end.

PIR motion detection

Adopted with the PIR sensor, when someone moves around the front door within 3 meters*, the AI human-oid detection algorithm will identify abnormal dynamics by instantly capturing a photo or recording a video. Then it will simultaneously push a message to the APP through the encrypted cloud server, which allows you to fully manage the dynamics at the doorway and avoid security risks.

* 3 meters: the maximum PIR motion detection distance is 3 meters, which can be set to 1 meter, 2 meters and 3 meters via the mobile App.

Multiple alerting

Featured multiple alerts such as anti-dismantling, system locking, and low battery level, and abnormal bolt, Philips Alpha-VP-5HWS instantly safeguards the family and reminds you of the lock status, making you feel assured and secure.

● Specification

General Characteristics		Modes		Alerts	
Material	Aluminium alloy	Operation mode	Auto mode	Remote	Low battery level alert
Finishing	IML wire-drawing	System unlock mode	General mode		Abnormal latch bolt alert
	Electroplating/baking varnishing		Dual verification mode		Share temporary PIN code
Color	Copper/Black	Electrical Power			Check access records
Handle	Push-pull handle	Power supply	Li-Polymer battery	Doorbell&	Set lock parameters
Mortise	Full auto mortise	Battery life	3 months*	Video	Visitor's arrival notification
	C-grade lock cylinder	Emergency charging	5V power bank		Surveillance of
Fingerprint sensor	Semiconductor	Operation Environment			outside situation via App
Connection	WiFi	Temperature	-20°C~+60°C		Remote video intercom via App
		Humidity	15%RH-93%RH		Surveillance of outside situation
Access Solution		Installation Requirements			via indoor screen
Outside unlocking	Fingerprint	Door thickness	38~60mm	Emergency escape	Indoor fast
	PIN code		60~90mm		opening mortise
	Key tag		90~120mm	Update	OTA & Batch
	Mechanical key	Door opening	Left-in/Left-out/ direction		update via rear interface
Inside unlocking	Temporary PIN code		Right-in/Right-out	Indicator	Low battery indicator
	Button	Door type	Wooden/Copper/Security		Lock status indicator
	Knob	Main Functions			System lock indicator
Capacity	Infrared induction	Lock	Indoor deadlock	Voice guide	Human voice guide
			System lock		
User PIN code	20	Safety	Hidden PIN code		
	(included one-time PIN code)		Outside forced lock mode		
Master PIN code	1		Dual verification		
Fingerprint	99	Alert	Anti-dismantling alert		
Master fingerprint	1		Outside forced lock alert		
Key tag	100				

*3 months: The actual battery life will vary depending on the using scenarios.
